

The first Singaporean company approved by CREST for the delivery of Penetration Testing services

In January 2016, in line with our mission to improve the current state of information security to world-class standards, we became the first Singaporean company approved by CREST (www.crest-approved.org) for the delivery of Penetration Testing services.

Although value can be obtained by appointing either certified testers or certified organisations, it is the combination of these that will provide you with the greatest assurance that the most effective tests will be conducted – and in the most professional manner.

We are a CREST Member company with CREST qualified consultants.

Industry Guidelines for Penetration Testing

The Association of Banks in Singapore (ABS) released **Penetration Testing Guidelines For the Financial Industry in Singapore** and recommend **CREST** as a way to obtain assurance of policies and procedures on penetration testing engagement methodologies, reporting, and data handling, as well as employee background checks on security assessors to protect the interest of Financial Institutions when engaging penetration testing service providers.

The CREST Penetration Testing Services Procurement Guide is aimed at the buying community, ie. organisations that need penetration testing services, and **provides practical advice on the purchase and management of penetration testing services**, helping you to conduct effective, value for money penetration testing.

What we do

We do penetration testing of information systems and offer actionable risk mitigation plans thus providing technical assurance and allowing our customers to manage the cost of information risk to the business, to reach the state beyond compliance with regulatory requirements, and to retain perception of the brand among their clients.

Statement of Purpose

We exist because we have a **passion for improving the current state of information security**, bringing it to world-class state, nurturing careers of future information security experts and making cyberspace and technology safer.

The Team of Centurions

Centurions were professional officers and backbone of the Roman army. As soldiers, they were known for their expertise with weaponry, dedication, and valour in battle, and as a result were made officers.

By integrating best practices into the foundation of our process-driven organisation, we enable all of our information security experts to be A players by following the best practice. To this end, Centurion is deemed a fitting name.

We combine superior ethical hacking prowess, trusted business acumen, comprehensive reporting, and unparalleled delivery, gained from hundreds of security assessments conducted by our information security experts.

Many Industries, One Focus

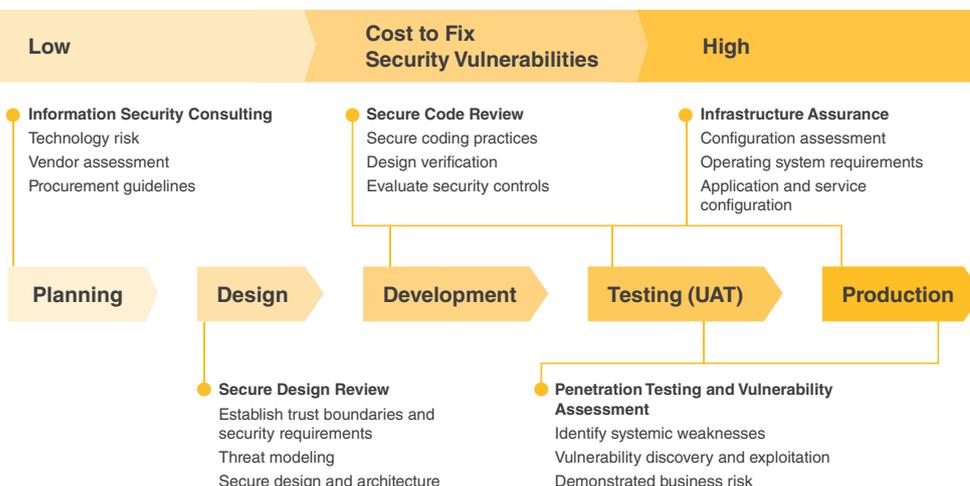

Centurion specifically tailors its work for every customer, whether an SGX 20 enterprise or a small-to-medium size business and provides world-class penetration testing and security advisory services to businesses that require a true assessment of their information risk.

Our Consultants Are The Security Experts

- Industry recognised certifications as recommended by ABS Penetration Testing Guidelines include:
 - CREST Registered Penetration Tester (CRT)
 - Offensive Security Certified Professional (OSCP)
 - Offensive Security Wireless Professional (OSWP)
 - SANS - GWAPT
- Speakers at major security conferences
- Published research and responsible vulnerability disclosures
- Attained G50 clearance for Government projects

Incorporate Security in the System Development Life Cycle (SDLC)

The CREST Penetration Testing Services Procurement Guide highlights the importance of **security testing being fully incorporated** into your organisation's system development life cycle (SDLC) and **avoiding conducting security testing as a "tick box" exercise at the end.**
